

Hunger: An Outlook to 2030

Hunger is “A state of deprivation according to which an individual cannot satisfy his/her basic food needs (quantity and quality), required for a healthy and active life.”

Heavy Trends

Scenarios to 2030

Key Drivers

Violence	Reduces	Reduces	No change	Increases	Increases
Women's empowerment	Strong gains	Culture Clash	Gradual gains	No gains	Loss
Food policy	North-South transfers improve	Grassroots movements in LDCs	Strong in MDCs, weak in LDCs	North-South transfers worsen	Strong in MDCs, weak in LDCs
Energy Policy	Diversification	Diversification	Fossil fuel dependence	Biofuels	Fossil fuel dependence
Climate Change Adaptation	Strong action	Limited action	Limited action	Strong in MDCs, weak in LDCs	No real action
Purchasing power	Increases	Increases in rural, decreases in urban	Increases in urban, decreases in rural	Inequalities in urban areas	Decreases
Commodity prices	Food prices decline	Food prices decline	Food prices incline	Food prices incline	Food prices spike
Trade	Fair trade	Protectionism leads to LDC growth	Free trade	Protectionism in MDCs, none in LDCs	Protectionism leads to trade wars

The challenges of addressing hunger are clear and require a strategy, as well as a multi-dimensional/long-term approach to see measurable change.
